

How to pass an Open Book test.

Open book tests teach you how to find information when you need it.

1. Take as many notes into the room as you are allowed.
2. Know where to find everything in the book.
3. Use sticky notes/flags to mark important items.
4. **Highlight** the key points before the test.
5. Plan your time for each question.
6. Work through easy questions first, then go back to the others.
